

10 years on the web! - Www.Dooley.Dk

As the 14th of march 2006 approach, the 10th year of dooley.dk (or the ET homepage as it was named in early years) on the internet, we from time to time get flashback's from the past 10 years, where the web and our webpage(s) has developed.

Back then in -93,-94,-95, I remember, my computer was installed with my DOS 6.22, Windows 3.11, the upcoming windows 95 and of course OS/2 3.0 warp! Everything running with bootmanager and full functioning on my brand new 486 80MHz, 8MB ram (no graphics card!) machine. With the incredible amount of 850MB hard disk, the only limit was the sky!

When I started to investigate the world wide web and develop our homepage in the spring of -96, my modem speed was 14.400 bit per second, state-of-the-art data transmission! It downloaded an entire 1.44 megabyte diskette in less than 5 minutes ! Still, it was hard at that time, to find any program as large as 1.44 megabyte.

The learning curve was right upwards and the nerd gene had to take control, in order to manage protocols as FTP and the configuration of the (few, if more than one) clients you could use to upload your webpage. Of course, if and when you understood what format a webpage was... Google, Yahoo or almost any search engines didn't exist at that time. You could write on the different BBS forums, IF you were invited, meaning if you knew somebody (in the REAL world!) who would recommend you.

Some statistics on domains: In 1981 there was 213 domains in the world, in 1996 a little more than 12.000.000 and in the start of 2006 around 360.000.000. The first Danish domain was established in 1987. In 1996 there was 6.548 domains in Denmark. In the beginning of 2006 there was more than 651.000 Danish domains.

We uploaded the first version of our homepage on the 14th of march 1996, with the great FTP program WS_FTP, to our first service provider ftp.dk-online.dk. The first page was very "basic". As months went by we managed to get some hold of it. The first backup/display we have nowadays, is from September 1997:

The Swindlers Rock'n'Roll home, TUTC - The Ugly Ties Club, Vespa Scooters and Extra Terrestrial homepage of Eva and Tom Kjeldsen

Welcome to the Extra Terrestrial homepage of... **E**va and **T**om Kjeldsen. phone.home@bigfoot.com!

Jump to the [TOP](#), the [SWINDLERS](#), the [VESPA SCOOTER](#), the [UGLY TIES](#), the [almost BOTTOM](#), the [very near BOTTOM](#) or the [PICTURE INDEX](#)

We live in the land of milk and honey, called [Denmark](#). Now you say, some thing's rotten in the state, but [where is Denmark?](#) Well, NO, it's not the capital of Sweden. More precisely, we live, in the middle of Denmark, in the city of Aarhus (Aarhus spelled in Danish). We are a family of 3 homo sapiens, [Stig](#) (the [newborn](#) wonder of February 24th -96, see his first [letter](#) here), Eva and Tom, and 2 species from the animal kingdom, the fat cat [Einstein](#) and the lab (under)dog named [Pascal](#). As a bonus we also have a aquarium with the king of malles, 15 year old, [Arnold](#).

Here below comes all the interesting stuff !!! (said just to stir you curiosity...)

Through the years, apart from the technical evolution, it is interesting to observe the development in standards (which is many cases are only standards to those who make them). We follow, and do not follow, trends and standards. Our main objective is to equally weight accessibility against funny/smart/useful features. Anyway we hope to see you in another 10 years! *Kind regards, Dooley.Dk, Tom Kjeldsen.*

Once upon a time in a galaxy far beyond the milky way, intelligent life in tuxedos decided that they would explore the last "dark holes" of the universe. So they came to the earth, broke through the atmosphere and looked down. Here's what they saw: "Life, evolving from water, reproducing itself by
